

Energy Management Policy

English Press Limited is committed to conducting its business operations in a manner that shall use energy in the most efficient, cost-effective and environmentally responsible manner.

We shall establish achievable energy performance goals to ensure continual improvement which is an integral part of our business strategy and operations.

Our efforts in promoting energy efficiency will support our commitment to our interested parties, the environment and the communities in which we are a part.

To achieve this, we shall:

- Comply with all laws and regulations with respect to energy usage including the Energy Act, 2019 and Energy Management Regulations, 2025.
- Continuously improve energy efficiency by implementing effective and sustainable energy management programs.
- Provide the necessary resources to achieve energy efficiency.
- Set internal energy and utilities usage bench marks.
- Monitor the usage of energy within the facility sub-segments.
- Develop energy conservation measures and create awareness to all interested parties.
- Maintain Energy Management Records of information.
- Train, educate and promote energy efficiency awareness among our employees and encourage them to save energy in their daily tasks.
- Reduce energy waste through promoting safe re-use, recycle and disposal measures whenever applicable and significantly reduce environmental impacts arising from energy use.
- Communicate this energy management policy to our employees, visitors, contractors and members of the general public and encourage them to support it.
- Strive to continuously improve our energy management by periodically reviewing this energy management policy, objectives and targets in light of our current and planned future activities.

This Energy Policy will be managed by the Energy Manager who will be supported by an Energy Management Committee.
